

teleskopy.pl

The binoculars with 10x magnification are universal equipment for bird watching, wildlife, very good astronomical binoculars for suburban sky. Favorite binoculars for hunters after the 35th birthday (exit \varnothing 5 mm) Fujinon FMT binoculars are designed for the most demanding users. They are equipped with BaK4 glass prisms with anti-reflective layers of the highest quality, similar to all lens surfaces (EBC technology), thanks to which the transmission of light is close to 95%, and sharp and contrast images. The applied lens system eliminates the curvature of the field, ensuring good mapping in the whole field of view. A very popular hunting binoculars Includes a neck strap, lenses covers and glasses, and a carrying case with a belt

Technical parameters

- Lens diameter: 50 mm
- Zoom: 10x
- Output: 5 mm
- Construction of prisms: porropryzmatyczna
- Material of glass elements: optical glass BaK-4
- Anti-reflective layers: MC, blue, total system efficiency 95%
- Field of view: $6.5^\circ / 113 \text{ m} / 1000 \text{ m}$
- Eye relief : 20 mm
- Relative brightness: 25
- Twilight efficiency: 22.4
- Adjusting the focus: individually for each eyepiece
- Minimum distance of observation: 10 m
- Range of eyepieces / output gauges: 56 mm - 74 mm
- Water resistance: YES
- Nitrogen filling: YES
- The option of connecting a tripod: YES
- Weight: 1,400 g
- Usage astronomy hunting sailing nature military

Warranty 30-year manufacturer's warranty Marks of Fujinon binoculars

- C - equipped with a built-in compass
- CF -

"central focusing" - central sharpening â€¢ ED - binocular optics made of extra low dispersion (Extra low Dispersion) glass, thanks to which a very good correction of chromatic aberration is obtained â€¢ F - like Fujinon and Flat Field - the highest quality selected optical elements for perfect mapping - contrast, sharpness and large field of view â€¢ M - "military" - meets the requirements of strength and durability for military binoculars â€¢ MT - "marine tested" - tested for navy (meets US Navy standards, including the impact of salt water) â€¢ r - "reticle" - built-in rangefinder â€¢ R - "rubber coated" - rubber casing â€¢ SX - computer-designed lenses and BaK4 prisms are covered with MC layers in the patented ECB technique (Electron Beam Coating), thanks to which for a single medium boundary the transmission reaches 99.9% of the beam intensity of the incident light; thanks to the transmission of the entire binoculars even up to 95% â€¢ WP - "waterproof" - waterproof binoculars (up to 2 meters deep)
