Fujinon binoculars - the highest Japanese quality Fujinon FMT binoculars are designed for the most demanding users. They are equipped with BaK4 glass prisms with anti-reflective layers of the highest quality, similar to all lens surfaces (EBC technology), thanks to which the transmission of light is close to 95%, and sharp and contrast images. The applied lens system eliminates the curvature of the field, ensuring good mapping in the whole field of view. Big depth of field - sharpness in the whole field of view from about 20 meters to infinity! Technical parameters

- â€¢ Lens diameter: 70mm
- â€¢ Zoom: 16x
- â€¢ Output: 4,4mm
- â€¢ Construction of prisms: porropryzmatyczna
- â€¢ Material of glass elements: optical glass BaK-4
- â€¢ Anti-reflective layers: MC, blue, total system efficiency 95%
- â€¢ Field of view: 4 ° / 70m / 1000m
- â€¢ Eye relief : 12,4mm
- â€¢ Relative brightness: 19.1
- â€¢ Twilight efficiency: 33.5
- â€¢ Adjusting the focus: individually for each eyepiece
- â€¢ Minimum distance of observation: 20m
- â€¢ Range of eyepieces / output gauges: 56mm - 74mm
- â€¢ Water resistance: YES
- â€¢ Nitrogen filling: YES
- â€¢ The option of connecting a tripod: YES
- â€¢ Weight: 1930g

Marks of Fujinon binoculars

- â€¢ C - equipped with a built-in compass
- â€¢ CF - "central focusing" - central sharpening
- â€¢ ED - binocular optics made of extra low dispersion (Extra low Dispersion) glass, thanks to which a very good correction of chromatic aberration is obtained
- â€¢ F - like Fujinon and Flat Field - the highest quality selected optical elements for perfect mapping - contrast, sharpness and large field of view
- â€¢ M - "military" - meets the requirements of strength and durability for military binoculars
- â€¢ MT - "marine tested" - tested for navy (meets US Navy standards, including the impact of salt water)
- â€¢ r - "reticle" - built-in rangefinder
- â€¢ R - "rubber coated" - rubber casing
- â€¢ SX - computer-designed lenses and BaK4 prisms are covered with MC layers in the patented ECB technique (Electron Beam Coating), thanks to which for a single medium boundary the transmission reaches 99.9% of the beam intensity of the incident light; thanks to the transmission of the entire binoculars even up to 95%
- â€¢ WP - "waterproof" - waterproof binoculars (up to 2 meters deep)
