

Burris 3-12x56 FourX is a telescope with classically nocturnal and twilight parameters for nighttime sittings. Perfectly crystalline optics, resistance in all conditions and a 10-year manufacturer's warranty. New generation riflescope: advanced optics and instantly adjustable backlight - ensures full readiness in all conditions. FourX telescopes offer almost as effective optics as the most expensive telescopes, because they were designed based on the patented light management system and HiLume precision multi-layer lenses. Thanks to them, spotting scopes provide very accurate, bright and sharp images. FourX provide efficiency for the hunter and prove his worth at the first meeting. Optically and mechanically, FourX, in many cases outperforms even the most expensive hunting optics in the world. The backlight is adjustable with a knob, it has 10 degrees of adjustment. All FourX models are: - waterproof - resistant to evaporation - shockproof. Includes cover for the lens and eyepiece. Technical parameters ∅ magnification: 3-12x ∅ Lens diameter: 56 mm ∅ Tube diameter: 30 mm ∅ twilight efficiency: 13 - 25.9 ∅ field of view: 10.33 - 3.33 m / 100 m ∅ cross: 4 ∅ backlight: yes, powered by CR2032 ∅ Eyepiece outer diameter: 42.5 mm ∅ Outer diameter of the lens: 65 mm ∅ length: 36 cm ∅ weight: 620 g Warranty 10-year manufacturer's warranty
