

teleskopy.pl

The Bresser MESSIER NT-150, 150/750 DOBSON telescope is a modern, timeless telescope. Despite the low price, this telescope offers a multitude of applications and quality competing with much more expensive telescopes. The

telescope will be suitable not only for beginners, but also for enthusiasts and experienced lovers of the night sky, who appreciate the high quality of images, fast setting and mobility of equipment. The basic features are quick setup and ease of use. All you have to do is put the telescope on the table, aim at the object and start observing. The telescope is ready to be observed within a few moments of being removed from the box. Accessories included - LED finder and two Kellner glasses enable immediate observation. Built-in compass and level allow for quick setting and orientation of the telescope.
