A BRESSER table stand with a height of 24 cm is much more versatile than it may seem. It can be used on dedicated observation stations as well as when placed on a table. It can be used with various types of binoculars and telescopes up to 1 kg. Comfortable and easy-to-use handlebars allow you to move the placed instrument in the horizontal and vertical lines and block the setting in a specific position. Foldable legs of the tripod allow for convenient storage. It is a simple, solid and reliable construction. Technical parameters – type: table tripod – height: 24 cm – mounting / type of screw: 1/4 inch, photo standard – load capacity: 1 kg – weight: 245 g Warranty 2 years
