

Take a photo with a smartphone via a telescope, a telescope or a microscope using an adapter that allows the smartphone to be simply attached to the eyepiece of the optical instrument. The Fotoadapter provides secure mounting and easy alignment of the optical axis of the smartphone and the optical instrument. You will now be able to take pictures of both distant objects and those close to you by fixing your smartphone to a telescope or microscope. The most important features

- universal adapter for mounting smartphones to the telescope, telescope and microscope
- maximum eyepiece diameter: 68 mm
- adjustment range of the smartphone holder: 50-88 mm
- adapter dimensions: 177 x 90 x 41 mm
- weight: 164 g
