. Stereoscopic Delta Optical Discovery 50 microscope - a reliable microscope with a very successful optics. It is characterized by high optical quality and top and bottom LED lighting with the possibility of adjusting its intensity. Thanks to the battery module Delta Optical Discovery 50, it also allows operation without mains power. Rotating lens changer, gives 20x and 40x magnification, and after retrofitting with optional 20x eyepieces, the maximum magnification will increase to 80x. Technical parameters ∅ head: binocular ∅ Dioptre adjustment: +/- 5D in both tubes ∅ magnification of the microscope: 20x / 40x ∅ field of view: 9 mm / 4.5 mm ∅ glasses: WF 10x / 20, 2 pieces ∅ lenses: 2x, 4x ∅ focus adjustment: macro, two-sided ∅ lighting: upper-reflected; lower-passing ? ce ∅ upper lighting: reflected LED ∅ lower lighting: passing LEDs ∅ observation technique: clear field ∅ microscope power supply: AC (mains), 3xAA
