

Vortex Fury HD 10x42 - it's a combination of the brilliant optics of the Vortex Viper binoculars with the Ranger 1500 rangefinder. This dual functionality makes it unnecessary to carry out binoculars and rangefinder separately, because everything is in one, unique device. Fury has all the advantages of daytime binoculars, including high optical resolution. Ergonomically set buttons allow you to easily control the rangefinder with one hand. HD optics with 42 mm lenses and 10x magnification fit into the canons of compact, versatile, lightweight everyday binoculars. Glasses of high optical density (HD), patented XR coatings, or phase correction confirm the uncompromising quality of the image that this optics has to offer. The laser measurement is controlled by means of two buttons. The rangefinder provides the user with a measurement taking into account the slope of the terrain, in a straight line and in the scanning mode. Impresses with its 1460 meter range, high accuracy and speed. The screen displays the results in red with the possibility of three-level adjustment of the brightness of the backlight. Two units of measurement to choose from - meters and yards (yd). Clear CR123 battery status indicator. Vortex Fury HD 10 x 42 LRF combines all the best in a unique whole! Do not go past the adventure that is at your drawing Characteristics

- HD glasses provide high resolution and low level of chromatic aberration
- dielectric phase coatings on prisms that increase image quality and transmission
- anti-reflective XR lens layer
- filling with argon (noble gas)
- Rubberized ArmorTek casing
- retractable eyecups

Rangefinder functions

- intuitive display
- HCD - this function allows you to measure distances with regard to the slope angle of the terrain
- LOS - displays the real distance of objects on the line of sight
- Scan - allows you to track the distance of objects in motion
- selection of the measuring unit - the rangefinder measures in yards and meters, depending on the unit selected by the user

Technical parameters

- magnification: 10x
- Lens diameter: 42 mm
- Twilight efficiency: 20.4
- minimum focusing distance: 1.5 m
- an angled field of view of 6.1 °
- linear field of view: 106 m / 1000 m
- offset of the exit joint: 16.5 mm
- eyecups: extendable
- distance between the glasses: 54 - 69 mm
- water resistance: yes
- gas filling: yes, argon
- lens coatings: XR FMC + phase covering of prisms
- possibility of connection to a tripod: yes (tripod adapter required)
- dimensions: 146 x 150 mm
- weight: 900 g
- lifetime VIP guarantee: yes

Warranty Lifetime warranty: if anything happens to your binoculars, Vortex will repair or replace it with a new one. * The warranty does not cover the loss, theft or intentional destruction of the binoculars. Elements of the set

- binoculars
- carrying case
- neck strap
- optics cleaning cloth
- documentation
