

teleskopy.pl

The Levenhuk Strike 80 NG is ideal for beginners and amateurs - an astronomical telescope that will help them learn about the fascinating world of stars, planets and distant galaxies. The possibilities of this telescope are much larger than those of other models in this series. Thanks to the 360x magnification through the telescope, you can see even such small details as: craters and hills on the moon, Mercury phase, Cassini gap between the rings of Saturn and its moon - Japet, the best visible changes in the atmosphere of Jupiter and the poles of Mars during the opposition. With the help of the telescope, you can even observe binary stars, for which the separation of components is 1.6 seconds of arc; the limit of the stellar magnitude is 11.5. All of these objects can be observed immediately after removing the telescope from the packaging! This telescope is perfect for any amateur astronomer. The assembly and use of the optical instruments included in the kit is so simple that even a child can observe the universe and discover its secrets. Levenhuk Strike NG is a completely new series of telescopes for novice and amateur astronomers. Levenhuk Strike NG telescopes are a reasonable proposition for people who do not want to waste time assembling and adjusting the telescope settings or choosing from numerous accessories. In addition to the telescope itself, the set contains optical instruments for astronomical observations and observations of objects on the ground, as well as astronomy guides that are interesting and useful for both beginners and more advanced users. All this makes the Levenhuk Strike NG series one of the best telescopes for beginners. The set contains all the elements that make the observations fascinating and entertaining. Providing a lot of information, guides and advanced software allow you to find the selected object in the night sky even for beginners. This magnificent telescope is packed in a colorful box and can be an ideal gift for any astronomy adept who will enjoy it for many years. The advancement level of this set will exceed your expectations

Elements of the set

- Levenhuk Strike NG telescope with azimuthal assembly and movement around the declination axis
- stainless steel tripod
- plastic focal tube 1.25 "
- two 1.25 "glasses: F20 mm, F6 mm
- Barlow lens 3x
- Dot 3x20 finder
- diagonal mirror
- "See everything!" - an astronomer's guide containing descriptions of 280 celestial bodies
- a set of posters depicting celestial bodies (Moon, Sun and other stars, Solar System)
- planisphere
- a CD with Stellarium software that will help you during astronomical observations
- compass
- user manual and warranty for a lifetime

Warranty lifetime manufacturer's warranty, 2-year shop warranty
