

Optisan EVE spotting scope is an interesting proposition for functional hunting telescopes, as well as for general shooting purposes. The solid aluminum construction is based on a 30 mm tube, thanks to which we obtain greater brightness, resistance and strength of the telescope construction. The telescope has closed turrets, which protects against accidental deregulation of the aiming point. EVE telescopes are equipped with functional cross-lighting. Country of production: Taiwan Technical parameters ∅ magnification: 2.5-10x ∅ Lens diameter: 50 mm ∅ field of view: 12,8 - 3,2 m / 100 m ∅ Tube diameter: 30 mm ∅ distance from the eye: 97 mm ∅ step adjustment: 0.1 MRAD ∅ maximum vertical adjustment: 14.73 MRAD ∅ maximum horizontal (windage) regulation: 14.73 MRAD ∅ type of turrets: closed ∅ filling gas: nitrogen ∅ length: 337 mm ∅ weight: 664 g Warranty 24 months
