

Braces for binoculars - thanks to this harness you can comfortably carry binoculars, a camera or a camera, having instant access to them, practically regardless of their weight. Braces are equipped with very wide stripes. The harness is made of elastic adjustable straps with a width, fastened on the back using a natural leather buckle. Such materials allow for a perfect fit to the body. They ensure that the binoculars are kept in a comfortable position. Basic features: 

- adjustable, elastic straps
- big, full "backpacks" - better spreading the load
- easy putting on and removing the harness
- keeps the binoculars in a comfortable position for quick access
- eliminates neck strain when handling particularly heavy binoculars, cameras, etc.
