

teleskopy.pl

The Levenhuk LabZZ M4 stereomicroscope is a very good tool for testing large minerals, stones, coins, soil samples, plants or insects. The microscope is neat, light and easy to use - a young biologist or geologist will help in conducting real scientific experiments and learning about the surrounding world, and the electronics or numismatist will allow for precise observations with a large, 40-fold magnification. The microscope is equipped with a comfortable binocular head and a lens ensuring 2x magnification. The set comes with two 20x magnification glasses, resulting in a final 40x magnification for high image detail. The perfect field microscope - very light, powered by 2 AA batteries ("sticks", battery socket in the base) Technical parameters ∅ magnification: 40x ∅ number of lenses: 2x ∅ glasses: interchangeable, 20x, 2 pieces, ? = 23 mm ∅ eyepiece range: 50 - 75 ∅ working distance: 75 mm ∅ lighting: LED, upper ∅ power supply: 2 x AA (not included) ∅ table: with clamps, ? = 50 mm ∅ operating temperature range: -5 ° C + 40 ° C Included: ∅ Levenhuk LabZZ M4 microscope ∅ WF20x glasses, 2 pieces ∅ cover for covering the microscope ∅ PL instruction Warranty 2 years shop warranty, lifetime manufacturer's warranty
