The Levenhuk Spyglass 12x30 SG2 riflescope is an ideal gift for a fan of stylish instruments and historical replicas. It is based on lunettes used centuries ago. Through this telescope, you can observe both moving and non-moving objects such as: cars, people, planes, animals and birds, as well as nature: landscapes, sea, weather and much more. The Levenhuk Spyglass SG2 telescope is not only a rare specimen, but also a valuable optical device. It provides a magnification of 12x and a good ability to collect light.
