

For years, the American company Bushnell has been a well-known manufacturer of ophthalmic optics, its binoculars, telescopes, telescopes and rangefinders are valued products on the outdoor shooting market. Such Bushnell product lines as Ellite: 3200, 4200 or 6500 and Trophy are recognized by hunters around the world. The Bushnell Trophy XLT spotting scope is equipped with an optical system that offers the shooter a variable magnification of 3 to 12 times and a lens diameter of 56 mm. The manufacturer has used anti-reflection coatings in the FMC system (FullyMulti Coated), which, in conjunction with the optical parameters of the device, guarantees a clear and most importantly bright image even in limited light conditions. The producer defines the level of light transmission at 91%. Antireflective coatings are not everything that improves the image quality of the shooter's eye. On the lens of the lens, Bushnell placed a special coating layer to significantly enhance the image contrast known as Amber-Bright. The crosshair that we deal with in this viewfinder is known 4A grid with illuminated point, whose illumination power is regulated by the third tower on the telescope tube with an 11-point, indexed scale. All mechanical and optical elements of the telescopes are enclosed in a monolithic, 30 mm diameter, mono-filled tube filled with dry nitrogen, preventing the internal glass elements of the viewfinder from misting up. Tubus has been strengthened and effectively protects the optical system from damage resulting from use in difficult hunting conditions. A special O-ring system protects the whole from getting wet. The Bushnell Trophy XLT 3-12x56 optical sight is dedicated primarily to hunters looking for a high-class crosshair sight at a low price. It will work great after mounting it on a cutter or chisel. Optics covers included. Technical parameters

- magnification: 3-12x
- Lens diameter: 56 mm
- Tube diameter: 30 mm
- twilight efficiency: 13 - 25.9
- field of view: 12.7 - 3.4 m / 100 m
- distance from the eye: 117 mm
- cross adjustment: 85 inches per 100 yd, 1 click = 1/4 MOA
- length: 355 mm
- weight: 656 g
- producer: Bushnell, USA

Warranty 12 months manufacturer's warranty
