

The Fenix ARE-C2 PLUS charger is a four-channel charger designed for charging Li-ion, Ni-MH and C-Cd type batteries in sizes from AAA to 26650. The charger can be connected both to the wall outlet and after an additional purchase. ciwie to the car lighter socket. This functionality allows you to use it on a camping site, while traveling or while hunting. After inserting the batteries in the charger and connecting it to the power supply, the LCD display will show information on the type of cell charged in the port, voltage and graphical visualization of the charge level. All four channels are controlled by separate buttons. Each time you press the button you will see information about the battery voltage, then what the charging current is and how long it will take to charge. Holding down the button longer will switch the LCD display off. A single click again activates the display. The advanced security system makes the ARE-C2 PLUS an extremely safe charger. It has a protection system against overcharging of batteries, temperature monitoring and protection against reverse placement of cells. Basic parameters: working temperature [°C]: -20 to +50; storage temperature [°C]: -20 to +85; LED battery charge indicator: missing; width: 75 mm; height: 28,5 mm; length: 140 mm.
