This is the new Fenix model with focus regulation - FD20. Compact, everyday use flashlight that uses 2 AA batteries. It is equipped with an innovative optical system of a double reflector. Adjusting the 360 degree focus moves the flashlight head, shifting the headlamp to the LED, zooming in and out. By adjusting the beam in this way, we obtain concentrated or diffused light. This system allows you to achieve high light efficiency and guarantees the stability of the beam. The switch controls four levels of lighting. The maximum power is 350 lumens and sends the beam to a distance of 115 meters. The IP68 standard makes the FD20 stand out in everyday use as well as during outdoor outings.

Technical parameters

- maximum stream of light: 350 lm
- maximum range: 115 m
- number of modes: 4
- maximum angle of glare: 78 °
- maximum lighting time: 80 hours
- tightness class: IP68
- duralumin fabric material, anodized according to MIL-SPEC
- resistance to fall: up to 1 m
- material of the cover: plastic
- Dual Light Beam System: yes
- diode type: Cree XP-G2 (S3)
- lifetime of the diode up to 50,000 h
- power supply: 2 x AA 1.5 V

Head diameter: 25.4 mm

Body diameter: 20 mm

weight without batteries: 87 g

included: torch, cover, spare rubber switch, spare gasket (o-ring), 2 pcs AA batteries

Warranty 66 months (after registration on the distributor's website)
