

The UC30 flashlight is already a legendary model in the Fenix offer. The UC series started the charging technology via the Micro USB port, which was also successfully adopted in other manufacturer flashlights. This model as well as its predecessor is characterized by small dimensions, high efficiency and excellent performance. Like its predecessor, it also competes for the best EDC flashlight. Equipped with Cree XP-L HI LED diode, providing a maximum output of 1000 lumens and a powerful beam of beam reaching a distance of 253 meters. These are really great results. The flashlight is powered by one 18650 lithium-ion battery, but is also compatible with two CR123A lithium batteries. All modes are controlled with one stainless steel side switch. In addition, the battery level indicator and the IP68 standard make the UC30 unattainable for both indoor and outdoor tasks. The addition that appeared in the newest version is the possibility to personalize the external appearance. Fenix provides us with two additional rubber rings in green and purple. Technical parameters number of modes: 6 range: 253 m maximum luminous flux: 1000 lm maximum working time: 150 hours maximum luminous flux: 1000 lm housing material: anodized duralumin according to MIL-SPEC Dual Light Beam System: yes lifetime of the diode up to 50,000 h power supply: CR123A x 2 cell resistance to fall up to 1 m IP protection class IP68 Head diameter [mm] 25.4 Body diameter [mm] 23.4 weight: 77 g (without batteries) elements of the set: flashlight, Fenix ARB-L18 battery (18650, 2600 mAh, 3.6 V, Li-ion) x 1, microUSB cable, cover (holster), plug for USB input x 2, spare o-ring x 1 (spare gasket) Warranty 5 years
