

Bicycle flashlight from the top shelf - Fenix BC30R is equipment that combines the latest technological achievements. On the one hand, the CREE diode, which provides a high power of 1800 lumens, a range of 161 meters and a long time of enlightenment. On the other, an LCD display showing the battery charge status and remaining time. Another determinant of this model is a built-in battery with a capacity of 5200 mAh, which can be charged via a USB cable. It should also be mentioned, known from other models, dual light beam system, which simultaneously lights up the area just before the wheel, as well as further distances. Very durable, waterproof (IP-66 standard) and aerodynamics makes the BC30R flashlight meet the expectations of a demanding cyclist. Technical parameters

- number of lighting modes
- maximum luminous flux: 1800 lm
- maximum range: 161 m
- angle of illumination: 120 °
- maximum working time: 36 hours
- housing material: anodized duralumin according to MIL-SPEC
- resistance to fall: up to 1 m
- IP protection class: IP66
- Dual Light Beam System: is
- Diode type: Cree XM-L2 (U2)
- lifetime of the diode up to 50,000 h
- supply, non-replaceable built-in battery (5200 mAh / 3.7 V Li-Ion) x 1
- width: 50.5 mm
- height: 31.8 mm
- weight without batteries: 221.6 g
- elements of the set: flashlight, microUSB cable, steering wheel mounting with rubber inserts, remote control, spare gasket for assembly

Warranty 25 months
