

The limited edition of the well-known and respected model of the Fenix  $\text{\textcircled{H}}$ HP15 headlamp saw the daylight at the beginning of 2015. This is an excellent option for people who need a powerful headlamp with direct access to the turbo mode. The use of appropriate solutions in the form of modern diode emitters and control systems allows you to obtain light power at a maximum level of 900 lumens. Such power allows clear lighting of the target at distances up to 178 meters. Thanks to the ability to choose between six flashlight operating modes, we choose the right power for current needs. Operating the switch does not cause the slightest difficulty, even when using gloves. The HP15 model is powered by four generally available AA batteries. Remember that using the best links ensures that the flashlight works properly. Like all Fenix  $\text{\textcircled{H}}$ flashlights, the HP15 has a durable casing that effectively protects the interior of the flashlight. In addition, its precise execution and the use of gaskets ensures waterproofness in the IPX-6 standard. Technical data  $\text{\textcircled{H}}$  number of modes: 6  $\text{\textcircled{H}}$  maximum lighting power: 900 lm  $\text{\textcircled{H}}$  maximum range: 178 m  $\text{\textcircled{H}}$  resistance to fall: up to 1 meter  $\text{\textcircled{H}}$  tightness class: IPX-6 / OB 3  $\text{\textcircled{H}}$  housing: high quality plastic  $\text{\textcircled{H}}$  lens: glass with AR layers  $\text{\textcircled{H}}$  power supply: 4 x AA 1.5 V  $\text{\textcircled{H}}$  weight: 155 g (without batteries) Warranty 60 months
