

The Fenix ARB-L16-700U battery is a lithium-ion cell with a capacity of 700 mAh, designed for all who do not want to be forced to use only traditional chargers or when their use is not possible. The battery has a micro USB input, which allows you to charge directly from another device, there is no need to take the charger (although the link can also be charged traditionally). Take advantage of the maximum working time of your device and enjoy the light even longer.

parameters

- â€¢ battery type: lithium-ion
- â€¢ capacity: 700 mAh
- â€¢ voltage: 3.7 V
- â€¢ no battery memory effect
- â€¢ protection against overheating: YES
- â€¢ short-circuit protection: YES
- â€¢ impact resistance: YES
