

A real combine, "all with" the ATN observation telescope prepared for customers hungry for technical innovations. GPS, Wi-Fi, e-compass, gyroscope - these are just a few examples of systems that this device has been equipped with. The X-Sight riflescope freely operates at night and during the day, it allows you to change the colors of the presented image and zoom in an unprecedented range. The whole is closed in a solid aluminum housing. Digital titanium! By using ATN X-Sight II HD you will no longer want to use a normal telescope. Functions

- day mode (color) / night (green and black and white)
- built-in WiFi - control from a phone / smartphone (iOS and Android)
- video recording in HD quality
- taking pictures in HD quality
- built-in compass
- GPS locator
- built-in microphone
- image stabilization (gyroscope)
- Geotag location
- digital zoom smooth
- infrared illuminator in the set

Technical parameters

- generation: digital, equivalent to gen. 2
- magnification: 3-14x
- lens: 50 mm
- distance from the eye: 65 mm
- field of view: 9 °
- resolution: 1080p ATN L130 Sensor 160 ln / mm
- display: ATN Obsidian II
- display operation modes: green / black and white / day (color)
- Diopter adjustment: +/- 5
- maximum recoil: 4000 J
- microphone: yes
- ports: HDMI, micro USB
- power supply: 4 AA lithium-ion batteries (8 - 12 working hours)
- SD card: 4 to 64 Gb
- video output: 1080p at 30 frames per second
- remote access: via a mobile IOS device or Android App
- assembly included for the Picatinny rail and cover

• dimensions: 294 mm x 79 mm x 87 mm

• weight: 975 g
