

teleskopy.pl

Levenhuk Skyline Travel 80 is a very compact telescope for balcony observations and for trips. The 80 mm f / 5 lens has significant observation possibilities at a short tube length. This is a complete observation set. In addition, the non-inverted terrestrial image allows the telescope to be used as an observation telescope for nature or sport shooting.

Technical parameters

- optical design: achromatic refractor
- lens diameter: 80 mm
- lens focal length: 400 mm
- lighted up: f / 5
- maximum useful magnification: 160x
- maximum magnification in the set: 142x
- focuser diameter: 1.25 "
- glasses included: K25 (16x magnification), K9 (44x magnification)
- Barlow lens: included, 3x (additional magnification 48x and 142x)
- angled connector: 45 ° (Earth image)
- finder: 5x20, optical
- assembly: azimuth
- tripod: aluminum, adjustable, 56 - 120 cm, with shelf for accessories
- additional features: shoulder bag included, compass integrated with the tube
- dimensions of the telescope in the transport bag: 67 x 22 x 11 cm
- weight: 3.8 kg
