

"How does it work? Earth" is an 80-page book that answers various questions about our planet. Written by the well-known populariser Przemysław Ruda, in a most accessible and interesting way, he introduces difficult issues to the youngest readers. For example, you can learn from it: "What is the earth?" "When did life originate on Earth?" "What are precious stones?" "How are the mountains formed?" The book clearly and simply explains what is seemingly complicated. Funny illustrations help in this. "How does it work? Earth" is a mine of answers that is the perfect gift for anyone interested in the history of our planet. Additional information Format: 16.5 x 23.5 cm Volume: 80 pages Cover:
