

The SynScan Wi-Fi Sky-Watcher adapter is a small device that allows wireless control of Sky-Watcher GO-TO mounts and telescopes using a tablet or smartphone using SynScan or SynScan Pro or using a PC via ASCOM. Technical parameters – dimensions: 48 mm x 38 mm x 25 mm – weight: 21 g – SynScan and SynScan Pro programs (applications) must be downloaded for free from the smartphone application system – For SynScan AZ mounts, the WiFi adapter is connected directly to the mount instead of the remote control via the included cable – when installing SynScan EQ6 PRO, the WiFi adapter is connected directly to the installation instead of the remote control via the original remote control cable attached to the installation – works with Sky-Watcher, Orion, Pentaflex telescopes equipped with a SynScan remote control Below: adapter connected to SynScan AZ mount (from Dobson SkyWatcher) - instead of the remote control Screen view on a smartphone - simple, intuitive menu, in Polish (sic!)
