The GoPro HERO 7 White camera is, according to the principle: cheaper and you can't do it well, it's the perfect device to start your adventure with GoPro. Like the other models, the HERO 7 White camera has a durable, leak-proof housing up to 10 meters immersion, a clear LCD display, voice command control and compatibility with GoPro accessories. The well-known and valued shape of the camera has been the same, and the white color of the camera gives it an original and unique look. The ability to record at 1440p and 1080p at up to 60 frames / sec., 10MP matrix, the ability to create time-lapse movies are the basic advantages of the new GoPro Hero 7 White camera. Other advantages of GoPro Hero White cameras: - digital stabilization that effectively eliminates vibrations and vibrations created during movement, providing a smooth image. - voice control, thanks to which the GoPro HERO 7 White camera listens to simple commands, allowing for quick hands-free operation. - short recordings, i.e. shots lasting 15 or 30 seconds, which translates into better management of space on the memory card and improves the quality of automatic editing in the GoPro Quik application. - portrait mode is the ability to record and take photos in a vertical format known from smartphones. - the streamlined interface is a new and clearer menu with the option of using a smartphone. - social media thanks to the integration of the GoPro App will be in a quick range with media such as Facebook, Instagram, Twitter. Now you can quickly and effectively send your friends memories in the form of photos and videos. - quickstories, which makes assembly and minor corrections as you like it pure fun, not a nasty duty. - data in the cloud where the manufacturer has allocated a subscription service of 250GB of disk space in the GoPro PLUS cloud. - High quality audio thanks to three microphones recording in stereo with noise reduction will make every important sound during recording be heard well. - quick charging of HERO 7 cameras thanks to which you can charge the built-in
