

Focus In Sight Pro rangefinder with measuring range from 4 to 600 meters Modes of operation: • standard measurement along the line of sight • measuring to a small flag type object in golf or hunting (measurement to the nearest object) • measurement in the rain / fog - sends a stronger signal; minimum distance 25 meters • object speed measurement, in the range up to 300 km / h • recalculated measurement - symbolized by the golf flag and angle; the rangefinder measures and displays the distance along the line of sight, then calculates the distance of the shot along with information about the difference in height or gives the calculated distance and slope in degrees • measuring the horizontal distance (HD), i.e. along the horizontal line and angle - facilitates aiming along the slope • measuring the height of objects The rangefinder automatically turns off 30 seconds after the last measurement for a longer battery life. Technical parameters • measuring range: 4-600 m • measurement accuracy: 1 m • magnification: 6x • lens diameter: 21 mm • angular field of view: 7.2 ° • linear field of view: 126 m / 1000 m • optics: BaK-4 • eyecup: twist (retractable; eye relief 16 mm) • coatings: FMC • minimum observation distance: 4 m • diopter correction: +/- 3 D • water resistance: yes • power supply: 1 x CR2 • dimensions: 74 x 36 x 100 mm • weight: 175 g Warranty 24 months
