The Camrock FV-1 video adapter is an extremely practical accessory that allows you to transform a typical photographic head into a film head. It's the perfect solution for people who combine the passion of creating movies and photos on a daily basis. Standard video heads are usually large, heavy and uncomfortable to transport. Thanks to the adapter you can quickly and easily change the ball head into a professional filming tool. The long and comfortable handle with foam grip will facilitate taking precise and smooth shots. The set also includes a quick coupling in the Arca Swiss standard. The Camrock FV-1 adapter is extremely easy to install. Preparation of the head for video tasks takes literally a few seconds. Thoughtful design and the highest quality materials make the product will last for years. All Camrock accessories are covered by a two-year warranty! Thanks to our adapter you will save time, money and space in your backpack! Technical parameters
