

teleskopy.pl

Dedicated quick connector adapter (QM / QD) with a diameter of 45 mm for mounting on the telescope of the night vision cap PARD NV-007 (NV-850 Patronus). The attachment creates a stable connection between the telescope / camera and night vision, without losing zero or reducing accuracy. The adapter is attached using a QR (quick release) lever, which allows you to quickly attach and remove the cap, without the need for tools. The adapter also has an 22 mm accessory rail. The most important information – material: duralumin – high mechanical resistance, for use with any firearms – is equipped with a Weaver rail on which additional accessories can be attached (backlight, collimator, microphone) Warranty 24 months
