

PolarPro Snorkel Filter (Aqua Series) - a red filter designed for blue waters for the GoPro Hero 7 Black, 6 Black and 5 Black camera (without waterproof case). Used mainly when recording underwater movies in blue waters, allows for better white balance and eliminating excess of green and blue colors in the recorded material. Made of scratch-resistant glass. Cover included. Installation requires no tools (push-fit). Intended for shallow and moderately shallow dives - typically up to 5 meters
