

EAF is coming - shockingly cheap drive for the ZWO lift. It will provide precise control over the focusing necessary for any astrophotographic activity. The device is available in two variants: 

- standard: drive body, flexible mount, engine mount, USB 2.0 cable
- advanced: drive body, flexible mount, motor mount, USB 2.0 cable, hand control, temperature sensor

 Technical parameters 

- motor: stepper, 5760 steps per revolution
- power supply: 12 V DC 5.5 mm x 2.1 mm, plus inside
- load capacity: 5 kg
- dimensions: 60 x 50 x 40 mm
- weight: 277 g

 compatibility 

- SkyWatcher Astrophotography Reflectors (Newton-astrographs), Black Diamond series, Dobsony, Maksutow-Newton
- SharpStar
- SkyRover
- TS Optics
- Astro Tech
- Feather Touch
- SCT and Mak-Cassegrain - an additional lift attached to the back of the tube is recommended, to which we connect EAF

 There should also be compatibility with Takahashi and GSO soon. There is a lot of additional information and answers (Q&A) on the product page: <https://astronomy-imaging-camera.com/product/zwo-eaf> Warranty 24 months
