Fotopro uFO Mogo is a lightweight and versatile flexible arm. It was designed to work with smartphones, sports cams, small cameras and other accessories such as lamps, microphones and preview monitors. Its advantages will be especially appreciated by travelers and vloggers. One arm - many possibilities uFO Mogo, despite its small dimensions, offers many possibilities and applications. The flexible arm, covered with a rubber, non-slip plastic material allows you to attach various accessories weighing up to 800 g in almost any place, e.g. on tree branches, handrails of stairs or bicycle handlebar. The arm is equipped with two 1/4 "male tripod mounts, compatible with most standard photo-video accessories. The set also includes two mounting adapters for mobile phones and a Bluetooth remote control with a comfortable wrist strap. Some ways to use the Mogo uFO flexible arm: 

- tripod
- monopod
- selfie stick
- hand mounting arm for various types of photo-video accessories, e.g. lamps, microphones, preview monitors

 Guarantee of reliability Fotopro uFO Mogo flexible arm is made of the highest quality plastics, ensuring exceptional strength, water resistance and low weight.
