Vortex Fury HD 5000 10x42 - is a combination of the brilliant optics of the Vortex Viper binoculars with a range of 5000 yards, i.e. over 4.5 km! This double functionality means there is no need to carry the binoculars and rangefinder separately, because everything is in one unique device. Fury has all the benefits of daytime binoculars, including high optical resolution. Ergonomically set buttons allow easy control of the rangefinder with one hand. HD fury with 42 mm lenses and 10x magnification fit into the canons of compact, versatile, lightweight everyday binoculars. High optical density (HD) glasses, patented XR coatings or phase correction confirm the uncompromising image quality that this optics has to offer. The laser measurement is controlled by two buttons. The rangefinder makes the measurement available to the user taking into account the slope of the terrain, in a straight line and in scanning mode. It impresses with a range of 5000 yards, high accuracy and speed. The screen displays the results in red with the possibility of three-level adjustment of the backlight brightness. Two units of measurement to choose from - meters and yards (yd). Clear CR123 battery charge status indicator. Vortex Fury HD 5000 10 x 42 LRF combines the best of everything into a unique whole! Don't go past an adventure that is at your fingertips

Characteristics

- HD glasses provide high resolution and low level of chromatic aberration
- dielectric phase coatings on prisms to increase image quality and transmission
- anti-reflective layer of the XR lens
- argon filling (inert gas)
- ArmorTek rubberised casing
- retractable eyecups

Rangefinder functions

- range: 5-5000 yards for the reflecting object
- measuring range for deer: 1600 m
- measurement accuracy: 1 meter / yard @ 100 meters / yards, 2 m / yd @ 1000 m / yd, 3 m / yd for a distance above 1000 m / yd
- intuitive display
- HCD - this function allows you to measure distances taking into account the slope angle
- LOS - displays the actual distance of objects in the line of sight
- Scan - allows you to track the distance of objects in motion
- selection of the measuring unit - the rangefinder measures in yards and meters, depending on the unit chosen by the user

Technical parameters

- magnification: 10x
- lens diameter: 42 mm
- twilight efficiency: 20.4
- minimum focusing distance: 6 m
- 6.1 ° angular field of view
- linear field of view: 106 m / 1000 m
- exit pupil offset: 16.5 mm
- eyecups: retractable
- prisms: roof BaK-4
- eyepiece spacing: 54 - 72 mm
- water resistance: yes
- filling: yes, argon
- lens coatings: XR FMC + phase prism coating
- tripod connection option: yes (tripod adapter required)
- dimensions: 146 x 150 mm
- weight: 900 g
- lifetime VIP guarantee: yes

Warranty Lifetime warranty: if anything happens to your binoculars, Vortex will repair or replace it with a brand new one. * The warranty does not cover the loss, theft or intentional destruction of the binoculars. Elements of the set

- binoculars
- case
- neck strap
