The Venom collimator makes shooting with a rifle, pistol or shotgun instant like the effects of deadly venom. Compact target design, wide field of view and 6 MOA spot provide such fast aiming. The solid construction allows the use of this collimator on any type of firearm without any caliber restrictions. For your convenience, the CR1632 quick battery replacement system has been designed - now you can do it without removing the collimator from the unit! The spot intensity adjustment knob and switch have been positioned to precisely change the collimator settings. The large car is adjustable horizontally and vertically by 1 MOA. The Venom Collimator is so light that you won't feel it on your weapon. Its weight with the mounting rail included in the set is only 45 grams! Optics - multilayer coated optics - improved light transmission due to multilayer anti-reflective coating on all glass surfaces - "premium" optical system - provides a wide field of view, so you can react quickly when you see your target Building - one-piece tube - the aluminum housing increases resistance and water resistance - water resistance - due to the use of gaskets, water, dust and dirt will not get into the optical elements - anodized coating - even greater resistance in your telescope thanks to the anodized coating. This coating will protect your telescope against scratches and corrosion for many years. The color obtained by anodizing will help you camouflage your shooting position. Additional qualities - unlimited distance from the eye - no critical distance from the eye, thanks to which it is possible to quickly track the target battery life - working time in the lowest mode is 550 hours in standby mode automatic standby mode - 14 hour standby mode increases battery life - fits into GLOCK MOS system Characteristics - high quality anti-reflective coatings - O-ring sealed tube ensures water resistance and protects the collimator from dust - nitrogen filling prevents internal evaporation Technical parameters - magnification: 1x - lens width: 28.1 mm - distance from the eye: unlimited - spot size: 6 MOA - gradual adjustment 1 MOA - maximum height adjustment: 130 MOA - maximum airflow adjustment: 100 MOA - length: 48 mm - weight: 32 g - lifetime VIP guarantee: yes Warranty Lifetime warranty: if anything happens to your telescope, Vortex will repair or replace it with a brand new one. * The warranty does not cover the loss, theft or intentional destruction of the telescope. (note: photos of version 3 MOA, here we offer a larger spot - 6 MOA)
