

Vortex Cantilever Precision QR mount is a fast and precise mount for the AR-15 platform for 30 mm spotting scopes. The offset allows you to accurately set the telescope's distance from the eye, especially when the rail in the rifle is moved backwards, as it is the case with AR-15 units. Construction, materials The Vortex Cantilever Precision QR assembly was made of 6061 T6 aluminum block and finished with hardened, hard to wear anodizing type 3 Mil-Spec in black. Technical parameters \varnothing type / construction: one-piece assembly with quick release (QR) \varnothing tube size: 30 mm \varnothing the number of bolts for 1 will cover: 4 \varnothing number of base screws: 2 \varnothing stopper pin: yes \varnothing Compatibility with 22 mm Weaver, 22 mm Picatinny rails \varnothing material: aluminum \varnothing mounting height: 6.17 mm \varnothing clamp spacing: 63.9 mm \varnothing clamping width: 25 mm \varnothing base length: 101.6 mm \varnothing overall length: 150.8 mm \varnothing weight: 252 g \varnothing EAN: 875874007048 \varnothing producer: Vortex, USA, made in USA Warranty Lifetime warranty: if anything happens to your telescope, Vortex will repair or replace it with a brand new one. * The warranty does not cover the loss, theft or intentional destruction of the telescope.
