

teleskopy.pl

The innovative design of this magnifying glass provides the opportunity to observe the object from above and from the side, without having to set it up. The large size of the container in combination with 4x magnification makes this magnifier ideal for observing animate and inanimate nature such as leaves, grasses, plant roots, twigs, mosses, lichen, mushrooms, insects, stones, sand, shells, etc. The removable upper part allows convenient placement of objects for observation. It can also be used as a separate magnifier. The magnifying glass is equipped with handles on both sides, allowing it to be held securely and comfortably during observation and handling. You can take it with you and even during ordinary walks get to know the details of the surrounding world. A plastic spider is included. Remember to release them after living observations. Also, provide them with appropriate conditions during observation. Technical parameters – diameter of the upper lens: 30 mm – upper lens magnification: 4x – side lens diameter: 30 mm – side lens enlargement: 4x – dimensions: 190 x 100 x 130 mm – weight: 180 g – manufacturer code: SGLP88711000
