Illuminated magnifier in black and white plastic frame with four magnifying lenses is a great help in various situations. The magnifying glass is equipped with backlight with 5 diodes. Four LEDs allow for lighting during use with white light. The fifth diode is a UV diode (emitting UV). Appropriate arrangement and a smooth way of switching LEDs allows you to choose the right LED depending on the lens you are currently using. A four-lens magnifier is also a great help from a jeweler, watchmaker, electronics and wherever it is helpful to view objects under magnification. Technical parameters ∅ magnification: 2.5x, 4.5x, 25x and 55x ∅ 90 mm, 21 mm, 20 mm and 10 mm ∅ power supply: 4 x LR1130 (AG10), included ∅ dimensions: 220 x 110 mm ∅ weight: 110 g Warranty 24 months
