Regardless of the capacity and number of used batteries, they will need to be charged at some point. Access to the electricity grid is not always the case. Newell SDC comes in handy - a small professional charger powered from a USB socket, equipped with three charging channels and LED status indicator. Compact dimensions The Newell SDC-USB is probably the smallest charger of this type available for purchase. Its compact dimensions make it easy to pack it with the rest of the equipment and take it on every journey. Many power options Thanks to the power supply from any USB port, you can use the device with a laptop, power bank, smartphone charger. It also allows charging while driving. Three charging channels and security The Newell charger has three independent charging channels, so you can charge your batteries faster. Advanced controllers regulate the parameters of the charging process, protecting against overheating and overcharging, ensuring maximum battery life. Charging status information The current status of the device is indicated by the LED - while charging it lights up red, the end of the process is signaled by the change of the LED color to green. Many years of experience The Newell brand has been on the market for many years and has a long list of satisfied customers among both professionals and photography enthusiasts. The charger is compatible with GoPro

system batteries, Newell batteries and other substitutes.
