

teleskopy.pl

The Levenhuk Rainbow binoculars series is an amazing range of high quality hiking binoculars. Each model comes with a convenient case for storing and transporting the instrument, a neck strap and a cleaning cloth. Attractive and modern packaging perfectly underlines the stylish look of the binoculars. Levenhuk Rainbow binoculars are equipped with a high quality optical system made of BaK-4 optical glass. This material is characterized by a high refractive index, thanks to which the generated image is clear and sharp. Prisms and lenses are covered with anti-reflection coating, which provides greater contrast and high intensity of the observed image. The main features of the Levenhuk Rainbow binoculars

- hiking binoculars with a stunning, colorful look
- very good quality optical system that guarantees an excellent image
- roof prisms and a foldable construction for a compact size
- central focusing knob for quickly focusing the image
- nitrogen-filled body for use in all weather conditions
