

Helical Focuser 1.25" ZWO - this is the product we've been waiting for a long time. It is basically an addition to astrophotography, for precise focusing on a main camera or OAG, but it also works well as an addition to SCT, MAK telescopes and many refractors, where it is an efficient manual microfocera. Technical specifications: bottom thread (fastening): T2 (M42x0,75), thread length 5 mm; thread at the outlet: T2 (M42x0,75); exit hole: 1.25" (31.75 mm) with brass clamping ring; travel range: 6 mm; precision of travel adjustment: 0.1 mm; minimum length: 48 mm; weight: 87.5 g; Warranty: 24 months
