

The Fenix ALL01 lanyard is a durable and very functional accessory for safely carrying large flashlights. The loop worn on the wrist is adjustable, so the leash fits every wrist. It was made of a braided nylon rope with a strength of 21 kg (breaking load) and a soft silicone tube responsible for comfort. The leash is especially recommended for the following flashlight models: SD11, SD20, TK47UE, TK47, TK72R, TK75.
