

The Energizer Vision Ultra HD headlamp is a combination of excellent parameters and small dimensions. Innovative Energizer Smart Dimming technology allows you to easily adjust the light intensity. Note also the possibility of charging via USB. In addition to white LEDs, the flashlight also offers green and red LEDs, for example for night hunting or

---

fishing - and of course for astronomy lovers . VisionGuard technology allows you to gradually increase the light intensity to avoid directing a strong light beam directly into the user's eyes. The low battery indicator on the front of the flashlight flashes when the battery voltage is low, indicating that they need to be replaced soon. Technical specifications
