

# teleskopy.pl

A good universal microscope for beginners who love the adventure with the microworld. Three lenses in combination with a zoom eyepiece allows to obtain magnifications from 40 to 640 times. The rich equipment makes it irreplaceable teaching aid. Power supply from batteries located in the base allows observation regardless of the availability of mains power. The microscope is equipped with a set of apertures on a rotating disk under the table, which allows you to choose the optimal microscopy conditions for each preparation. The body of the microscope covered with non-slip plastic and the handle integrated with the body allows easy carrying of the instrument. The profiled eyecup of the eyepiece allows convenient observation. Equipment - loupe - dropper - measuring cylinder - tweezers - a box with a set of slides and finished preparations - shellfish eggs - medium - 3 empty vials Finished preparations - Epidermis onion - onion skin - Stomata - stomata - Hydrilla verticillata - percolate percolate Technical specifications

- â€¢ type: biological microscope
- â€¢ head: monocular
- â€¢ magnification range: 40 - 640x
- â€¢ eyepiece: 10x-16x, zoom
- â€¢ 4x, 10x, 40x lenses
- â€¢ lighting: bottom, LED
- â€¢ power supply: batteries
- â€¢ shifting the specimen: manually (table with paws)
- â€¢ focusing: macrometer screw
- â€¢ height: 24 cm
- â€¢ weight: 0.5 kg

Warranty 2-year shop warranty, 5-year manufacturer warranty
