The Yukon company deservedly occupies one of the leading positions in the market of night vision devices. The huge success of the Photon / Photon RT digital sights made the Yukon company decide to "follow the blow" and create an even better product. It was clear that the market needed a new device, equally affordable but with higher performance than the Photon RT. As a result, the Sightline S series appeared on the market, thanks to which a significant breakthrough in the segment of night vision sights was made. NOTE: not included in the kit

Technical parameters "

product type: digital night vision sight " minimum magnification: 4x " maximum magnification: 16x " digital zoom: 4x "

Objective diameter: 50 mm " sensor resolution: 1280x720 pixels " including sensor: CMOS " display resolution: 1024x768 pixels, AMOLED " angular field of view: 5.5 ° @ 4x " linear field of view: 9.6 m / 1000 m (@ 4x) " recording: none " power supply: AA, DNV, working time approx. 3.5 h " observation range: 350 m " reticle: digital, 6 types " cross adjustment: yes, 1 wedge corresponds to 10.5 mm / 100 m at 6x magnification " image colors: black and white " infrared illuminator: invisible, 940 nm, diode " minimum focusing / observing distance: 10 m " diopter adjustment: yes, -2.5 / +5 D. " WIFI: no " shock resistance: 6000 J " tightness class: IPX4 " dimensions: 285 x 89 x 81 mm " weight: 840 g

Warranty 36 months
