The Focus in Sight 400 m rangefinder is the perfect tool for anyone who needs solid equipment to use it in the field, whether it is hunting, hiking or (preliminary) surveying and construction works. This device has been closed in a light, sealed casing, so it can be used without fear even in adverse weather conditions. The prisms made of BaK-4 glass and lenses covered with a full multi-layer anti-reflective coating are responsible for the perfect image quality. Due to the large distance from the exit pupil of 16 mm, this rangefinder can be used without any problems by people wearing glasses. The most important features of the Focus in Sight 400 m rangefinder " sealed housing resistant to dust and splashes " Incredibly easy one-button operation " special mode for operation in rain or fog " Ability to give priority to distant objects while avoiding nearby obstructions Technical parameters " maximum range: 400 m " magnification: 6x " Objective diameter: 25 mm " linear field of view: 126 m @ 1000 m " angular field of view: 7 ° " offset of the exit pupil: 16 mm " prism material: BaK-4 glass " anti-reflective coating: full multi-layer coating " diopter adjustment: +/- 4 D. " waterproof housing: yes " dimensions: 100 x 74 x 36 mm " weight: 175 g Kit components " Focus in sight 400 m rangefinder " cover for
