The Redleaf IP Cam 1000 WiFi camera is a perfect, simple and reliable surveillance solution. Thanks to it, your home, office, shop or restaurant will be under constant supervision. The watchful eye of the camera detects any suspicious movement and automatically sends an alarm to your smartphone. The device can be remotely controlled by a mobile phone or a computer from any place on Earth that has Internet access. Main product features " Full HD resolution " ONVIF protocol support " two-way audio communication " simple WiFi setup " rotating head, wide field of view " preview and PTZ control with a smartphone, tablet or computer " recording and reading video from the application level " night mode (four infrared LEDs) " strong stage lighting (four white LEDs) " automatic motion detection and object tracking " alarm function with sending a notification to a mobile phone " Micro SD cards support up to 128 GB " efficient H.264 codec " housing resistant to adverse weather conditions (IP66) " wide compatibility (Android, iOS, Windows) You can see everything like in the palm of your hand The device records in Full HD resolution (1920 x 1080 px). The picture is very clear and full of details. With the Redleaf IP Cam 1000 surveillance camera you will keep an eye on everything that happens in your home or business while you are away. Two-way voice communication The camera is equipped with a

microphone and a loudspeaker, ensuring two-way audio communication in real time. Thanks to it, you can, for example, talk to your children at home, provide information to employees in the company or to a courier at the gate. Effective compression codec Camera recordings are saved using the efficient H.264 codec. Thanks to it, video transmission is smooth, and more hours of material can fit on the memory card. Rotating head The camera head has a large range of motion, rotates by 270 ° horizontally and 90 ° vertically. Combined with the wide-angle lens, it gives the field of view almost 360 °. You can control it using the application on your smartphone, getting an overview on every centimeter of the monitored area in your home or office. Waterproof design The device is resistant to adverse weather conditions. It is not afraid of heavy rains and snow. This is confirmed by the IP66 waterproof class. Regardless of the weather, the Redleaf IP Cam 1000 will always be ready for action. It has been designed to work both inside and outside the building. Motion detection alarm No suspicious movement escapes the camera's attention. It will be detected and logged so that the thief cannot hide. You will be informed immediately of the incident via an alarm sent to your phone. Support for large-capacity memory cards The Micro SD slot supports TF cards with a capacity of up to 128 GB. With this free space, you can record and save hours and hours of videos for later playback. 24-hour monitoring The Redleaf IP Cam 1000 camera is equipped with four infrared LEDs and the same number of white LEDs used to illuminate the monitored scene. This configuration ensures a clear image, even in complete darkness. P2P remote access Thanks to the convenient P2P technology, you can watch live footage from the camera anywhere, anytime. It is enough to log into your account in the application using a smartphone, tablet or laptop to have a glance at the monitoring installed in your home in the blink of an eye. Share the view with others The monitoring system can be expanded with additional cameras. The device supports the ONVIF protocol and allows you to share video and sound with other users of your choice. Two connection methods The camera can be connected to the network router either wirelessly or with an Ethernet cable. The double antenna provides a stable and strong signal. The connection is easy to set up and the camera software works with many systems (Android, iOS, Windows).
