Levenhuk Zeno Refit ZF21 is a bifocal magnifier placed on a table stand with additional handles. Due to the high comfort of work, this type of construction is often referred to as the so-called third hand . This product is equipped with a bifocal lens made of a mechanical damage resistant optical plastic. Due to the wide range of adjustments, Levenhuk Zeno Refit ZF21 Magnifier is perfect for all kinds of precision work that requires freedom of manipulation with both hands (SMD electronics soldering, jewelery or watchmaking work).
