Elegant, handy binoculars for children with very good optical characteristics with the parameters of 3 × 30. The combination of the magnification and the diameter of the lens provides a large field of view and comfortable observation. The binoculars are equipped with a sensitive focusing knob. Thanks to this, it is possible to focus both on objects that are nearby and those that are farther away. The lenses covered with FC type layers ensure proper efficiency of the optical system. The body of the binoculars is made of a pleasant-to-touch material with a shape that makes it easier to hold the binoculars during the observation. The rubber eyecups provide a convenient parameter of the pupil distance and allow for observation with glasses. The accessories include a pouch with a belt clip, a lanyard and a cloth for cleaning the optics. National Geographic 3 × 30 binoculars are an indispensable companion of children's games with interesting colors.
