Binodob is a brand new product of the Italian company Geoptik and is a necessary equipment for all who observe nature or the sky through binoculars on a tripod. It is a suitable head, on which you can attach binoculars weighing up to 4 kilograms and up to 100 millimeters of lens diameter. The head is movable (azimuth, teflon sliding surfaces). It allows attaching a standard counterbalance from the telescope (up to 3kg) for a better balance of the structure. With this device you can conduct observations comfortably, from the horizon to zenith. Material: anodized aluminum.
