The Swarovski EL series binoculars set new standards due to their innovative design, excellent optical parameters and unrivaled mechanics. The binoculars used many innovative solutions, unparalleled in models from other manufacturers. EL series binoculars combine maximum functionality, innovation and style. The unique way of holding allows comfortable handling even with one hand. Low weight and good balance facilitate long-term observation without unnecessary effort. The refined optical system of the highest quality is responsible for the contrasting and faithful image.

The light weight of the EL 32 binoculars makes it easy to carry it for a long time, and the user-friendly compact design means that it is not only great in the hand, but can also be hidden in almost every jacket. In addition, it is characterized by extraordinary quality of observation at short distances. Thanks to the minimum focusing distance of only 2 m, the EL 32 is ideally suited for observing nearby objects. In total, we get a select day binoculars for hunters and ornithologists and all those who value the highest quality offered by Swarovski Optik.
