Great pocket binoculars from the Austrian company Swarovski Optik for the most demanding customers, with 8x magnification and lens diameter of 20mm. SWAROVSKI OPTIK Pocket binoculars are small and light, so they fit in every pocket. Excellent optical system and the highest quality materials will surely satisfy the expectations of even the most demanding user. An advanced optical system with high transmission lenses offers excellent image even in low light conditions. Thanks to coating with special SWAROBRIGHT coatings, perfect color fidelity has been achieved throughout the entire spectrum of light. SWAROTOP and SWARODUR coatings allow you to improve the image contrast. The field of view of this model is 115 m per 1000 m. Individually adjustable eyecups provide a full field of view also for those who wear glasses. The durable and durable body is made of aluminum, the binoculars are dustproof and waterproof - allowing you to immerse up to 4 meters deep. The nitrogen filling prevents the steam from accumulating from the inside of the system when the temperature changes and the air humidity is high. Included with the binoculars is a cover, a strap with the possibility of easy length adjustment, lens cover and eyewear protection, protecting against dust and rain.
